

SAHETMYRAT KAKAJANOV

ABOUT ME

A software developer passionate opened for a new professional challenge and ready to take on responsibilities. Reliable team member always ready to help. Quick learner with problem-solving and decision-making mindset, and excellent interpersonal skills, I am seeking to be employed in a company with strong organizational culture, where I can add value using my skills.

WEB PROJECTS

[Social Media web App](#)

Description: Social Media Website featuring user registration with email verification, customizable profile pages with tabs for posts, followers, followings, photos, and personal information. Implemented functionalities such as uploading avatars and cover images, following/unfollowing users with email notifications, and displaying follower counts. Created a dynamic home page layout, allowing users to view posts from groups they're part of and users they follow. Integrated features for creating, updating, and deleting posts with attachments, including attachment previews and download options. Implemented group functionalities such as creating, joining, and managing groups with user roles and approval systems. Incorporated additional features like AI-powered post descriptions, search functionality with hashtags and deployment using Hostinger SSH and email sending.

Developed functions: CRUD, Search, Filter

Used technologies: PHP, Laravel 10, MySQL, Inertia VueJS, TailwindCSS, Docker, HTML 5, MVC. GITHUB, Ubuntu, GitHub Actions, AWS.
